

SGI: Instalación VS Community 2017 en Windows 10

miércoles, 6 de septiembre de 2017 12:55

IDE

<https://www.visualstudio.com/es/vs/community/>

GitHub Extension

<https://visualstudio.github.com/>

The image displays a series of screenshots documenting the installation and initial setup of Visual Studio Community 2017 on Windows 10.

- Installation Window (Left):** Shows the 'Componentes individuales' (Individual components) tab. The 'Desarrollo para el escritorio con C++' (Desktop development with C++) component is selected and circled in red. The 'Resumen' (Summary) section on the right lists the included features.
- Installation Window (Right):** Shows the 'Componentes individuales' tab. The 'GIT para Windows' (Git for Windows) component is selected and circled in red. The 'Resumen' section on the right lists the included features.
- Visual Studio IDE (Bottom Left):** Shows the 'Página de inicio' (Home) screen. The 'Crear nuevo proyecto...' (Create new project...) button is circled in red.
- New Project Dialog (Bottom Center):** Shows the 'Nuevo proyecto' (New project) dialog. The 'Visual C++' category is selected, and the 'Proyecto vacío' (Empty project) option is chosen. The 'Tipo: Visual C++' (Type: Visual C++) dropdown is set to 'Visual C++'.
- VSIX Installer (Top Right):** Shows the 'Instalador de VSIX' (VSIX Installer) window. The 'Instalar' (Install) button is highlighted.
- Team Explorer (Bottom Right):** Shows the 'Explorador de soluciones' (Solution Explorer) and 'Team Explorer' panels. The 'Seminar_01' project is visible in the 'Explorador de soluciones'.
